

Layouts:

- Intro/Splash Screen
- Main Library:
 - ViewModel:
 - Drawing class for individual panes
 - List<Drawing>, List<MenuSelect>
 - View:
 - Popup when clicking on more options menu to save, export, delete, etc.
 - Top bar w/ selection, creating a new file, sharing
- Drawing Canvas:
 - ViewModel:
 - Drawing class
 - View:
 - Canvas to draw on
 - Top bar with brush types, eraser, image detection, saving/exporting/sharing
 - Color selection bar
 - Popup that shows detected objects
 - Popup for sharing

Classes/Functions:

Drawing

- Drawing object CRUD (canvas itself):
 - Add drawing
 - Get drawing (used when selecting it to edit in the library)
 - Update drawing (actual drawing and editing the canvas)
 - Delete drawing
- Drawing Functions
 - Draw function, takes in a color, position on screen
 - Erase function, position on screen
 - Set color function, takes in a new color
 - AI detector function, takes in the picture itself
 - Save function
 - Import function
 - Export function
 - Sharing function

Unit Tests:

- Test for each button that goes to a new screen

- Test each function button
- Make sure drawing works in canvas
- Test for lists updating when needed

To-Do Order:

1. Making layouts - Alex
2. Layout/Screen navigation - Alex
3. Basic Drawing CRUD - Esther
4. Actual basic drawing functionality (pen, erase, color select) - Daniel
5. Save, import, export - Daniel
6. Cloud, sharing - Esther
7. Unit testing (plan at the start, run successfully at the end) - Esther
8. AI detection - Alex
9. User guide and documentation - Daniel
